Io Design Collaborative is an interdisciplinary design studio integrating architecture and landscape architecture into vibrant urban design projects. Our focus is on creating sustainable designs that integrate a strong ecological foundation and provide place-making through both historic preservation, and innovative design and infill. Our work predominantly includes development master planning, park and plaza design, and some commercial/residential architecture and landscape projects as well. Io was the winner of the 2016 the AIA Utah, ReVIVE Lester Park Design Competition.

We are seeking a summer intern with at least 1-2 years of Architectural or Landscape Architectural educational experience. Applicants must have:

- Interest in interdisciplinary design (or a background in another design related field such as graphic design, industrial design, or interior design)
- Competent in Sketch-Up, Photoshop, Illustrator and In-Design
- Experience in REVIT, AutoCAD or other design/drafting programs preferred but not necessary.
- Good hand graphic skills preferred but not necessary.

Our small office is growing, and working on some fun and exciting projects. This summer internship will provide exposure to various aspects of landscape architecture, urban design, and architecture at a master-planning level; along with aspects relating to marketing and business development. There may also be a possibility of working part-time, remotely, during the following school year. Our office is based in Ogden, Utah, home to a growing urban revitalization scene, and in close proximity to some excellent outdoor recreation opportunities!

If interested please send resume and portfolio to shalae@iolandarch.com
